Continuation of Attachment(s) 9. Other: A reference of Pakbaz et al. (US 6,569,706 B2) is cited. Pakbaz shows in Fig. 3 a device that relates to an organic light emitting diode which comprises a substrate 302 (see column 2, line 50. Note that glass substrate is 302 not 300) with a device region (304, 306, 308 and 310 in combination) thereon; an active component, for example 308 on a surface of the substrate 302 in the device region, wherein the active component includes an organic light emitting diode; a cap 321 mounted on the substrate 302 to form a package, the cap 312 creating a cavity over the device region to seal the active component; and spacer particles 314 fixed to the substrate and the cap. However, Pakbaz fails to teach having the spacer particles fixed to the active component as claimed .
